Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 October 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-68 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-68 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thurn et al. US 3,873,489 or Scholl et al. US 5,650,457.

3. Each of the cited patents shows diene rubber compositions used in tire and tire tread applications, see Scholl et al. in the abstract and Thurn et al. at col. 8, line 6. These patents further show the incorporation of alkoxysilane tetrasulfide compounds.

4. These patents are different from the art because there is no example of the claimed compound being used in the diene rubber composition. The claims are obvious because the claimed compound is suggested in the art and one is directed to use it in the diene rubber and, further in tire/tread applications.

5. Specifically, the compounds in Scholl et al. differ from the claimed compound in the alkyl bridge between the sulfur and silicon. The patent shows a methyl where the claim is limited to propyl. This is seen to be a homolog of the claimed compound. The propyl bridge is addressed in column 1, lines 28+. Here, a disadvantage is mentioned when using the propyl group as a bridge. Case law has well established that a mentioned disadvantage does not properly constitute grounds for patentability and that homologues must possess unobvious properties in order to be patentable.

Art Unit: 1713

6. The Thurn et al. patent shows alkoxysilane tetrasulfide compounds where the groups can be selected so as to render the compound obvious. Column 2, lines 40+ shows compounds where the alkyl bridge is preferably 2 or 3. The single alkoxy group on each silicon atom is suggested as well.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.
